

Siebel 20 Upgrade Workshop

Background:

This workshop teaches students how to install and administer Siebel 20.x and how to perform a typical upgrade from a previous version. The course is complete with hands-on exercises for each step in the process.

Prerequisites:

The seminar assumes familiarity with Siebel Enterprise Applications IP14 or above.

Environment:

The target environment for this seminar is Siebel 20.x

Content:

- Siebel Installation: Architecture & Siebel Management Console
- Siebel Installation: Profiles, Deployments
- Siebel Installation: Siebel SES, AI, Tools Installation
- Siebel Upgrade: Upgrading the Physical Schema
- Siebel Upgrade: Repository Merge
- Siebel Upgrade: Repository Merge Analysis
- Siebel Upgrade: Post Merge
- Siebel Upgrade: Test and Production
- Siebel Upgrade: Good Practices
- Siebel Upgrade: Siebel Migration Application

The course materials provided are copies of all slides and exercises, plus access to a live Siebel training environment – one per student – during the class.
